WEBSITE PROPOSAL FOR DRIPLAND BARBERSHOP

1. Introduction

The internet has become an essential tool for businesses to communicate with customers, promote their services and improve operational efficiency. A professional website enables businesses to strengthen their online presence, increase customer engagement and provide convenient access to important information. The proposal recommends the design and development of a website for Dripland Barbershop to improve its management processes, increase its visibility and support business growth (Laudon and Laudon, 2022).

2. Company background

Dripland Barbershop is local barbershop business located in a township called Mkhuhlu in Mpumalanga, South Africa. The business was established in 2019 and has made a huge influence on most kids in the township by providing high-quality haircut, modern hairstyle, beard grooming and excellent customers' service. Through consistent quality and skilled barbers, Dripland Barbershop and skilled barbers, Dripland Barbershop has built a loyal customer base within the local community.

Despites it's success, the business does not have a dedicated website. Customers rely mainly on walk-ins, phone calls or social media to obtain information or make enquiries. The absence of a websites limits the business's ability to manage appointments efficiently, advertise its services and reach new customers (Chaffey, 2022).

3. Problem Statement

Dripland barbershop currently faces many challenges because it does not have an official website.

These challenges include:

Customers cannot book appointments online.

Business information such as operating hours, services, prices and location are not available on one central platform.

Customers enquiries are managed manually, which can result in delays and missed appointments.

The business miss opportunities to market promotions and special offers.

These challenges affect the customer convenience and reduce the overall efficiency of the business (Kotler, Kartajaya and Setiawan, 2021).

4. Purpose of the proposal

The purpose of this proposal is to recommend the design and implementation of a modern, responsive, and user-friendly website that will improve customer experience and support the daily operations of Dripland Barbershop. The proposed website will provide customers with easy access to information while helping the business improve communication appointment management and marketing (Pressman and Maxim, 2020).

5. Objectives

The proposed website aims to:

-Establish a professional online presence for Dripland Barbershop.

-Increase awareness of the business.

-Increase customer satisfaction.

-Support future business growth

(Pressman and Maxim, 2020).

6. Target audience

-The website will target:

-Existing customers

-New customers within Mpumalanga.

-Students.

-Working professionals.

-Visiting searching online for local barbershop.

7. Proposed website features

The website will feature the following pages and features:

Home Page

-Welcome message.

-Business overview.

-Featured services.

-Promotional banner.

About us

-History of the business

-Mission and vision.

-Introduction to the barber team.

Services

-Haircuts.

-Beard grooming.

-Hair styling.

-Children haircuts.

-Price list.

Online booking

-Appointment booking form

-Date and time selection.

-Booking confirmation.

Gallery

-Photos of hairstyles.

-Before and after images.

-Customer transformation.

Testimonials

-Customer reviews and ratings.

Contact Page.

-Telephone number.

-Email address.

-Physical address.

-Google Maps Location.

-Contact form.

Social Media Integration

-Facebook.

-Instagram.

-WhatsApp

(Pressman and Maxim, 2020).

8. Functional Requirements.

Website should be able to:

-Display business information

-Allow customers to make online bookings

-Display services and prices.

-Store booking information securely.

-Provide directions to the business

(Pressman and Maxim, 2020).

9. Non-Functional Requirements

The website should:

-Be mobile-friendly.

-Load faster.

-Be secure using HTTPs.

-Be easy to navigate.

-Be visually attractive

(Pressman and Maxim, 2020).

10. Technology to be used

Front-end

-HTML

-CSS

-JavaScript

Database

-MySQL

Additional tools

-Google Maps

-Google Analytics

(Pressman and Maxim, 2020).

11. Benefits of this upcoming website

-Improve business management.

-Increase online visibility.

-Attract new customers.

-Reduced missed appointments.

-Build a stronger professional image

(Pressman and Maxim, 2020).

12. Project Timeline

Phase	Duration
Planning and requirements gathering	1 Week
Website design	2 Weeks
Website development	3 Weeks
Testing	1 Week
Deployment	1 Week

Estimated project duration: 8 weeks (Chaffey,2022).

13. Budget

The estimated budget that will be needed after all calculations will be R24000 that will be covering the complete design, development, testing and deployment of a professional website for Dripland Barbershop. It also includes the first year's domain registration and web hosting costs. This investment will provide the business with a modern online presence, improve customer engagement through online appointment bookings and support future business growth. The website is expected to reduce manual booking processes, enhance marketing efforts and attract more customers, making it a worthwhile long-term investment (Pressman and Maxim, 2020).

14. Conclusion

Dripland Barber has established itself as a trusted barber business by many people in its community since founded in 2019. The lack of a dedicated website limits its ability to manage appointments efficiently, promote its services and reach a wider customer base. Developing a professional website will improve customer convenience, strengthen the business's online presence and support future growth. This proposed website will provide an effective digital platform that will enhance customer satisfaction while improving the overall management and competitiveness of the business (Chaffey, 2022).
